COARSE PREPARATION

The small STRAKVLAK model is suitable for the coarse preparation of the sub-base layer. It can shift large quantities of material, enabling a coarse levelling of the site. It enlightens the physical exertion of your employees. The small STRAKVLAK model is infinitely adjustable from 70 to 120 cm.

WHAT IS THE STRAKVLAK?

The STRAKVLAK is a manual levelling assistant which can be used in situations where mechanical levelling is not an option.

The STRAKVLAK is available in three models, a small and two large versions. These models have a supplementary function.

ACCURATE LEVELLING

After the coarse preparation, the large STRAKVLAK model can be applied for accurate levelling tasks. It is infinitely adjustable from 117 to 210 cm. There is also a DUO model adjustable from 210 to 303 cm. Both the small and large STRAKVLAK have straight levelling blades. They can also be positioned triangular.

STRAKVLAK®

LEVELLING WITH EASE

WORKING WITH THE RIGHT POSTURE

The STRAKVLAK is equipped with sturdy, lightweight plastic wheels, which are maintenance free and are adjustable in height per 0.5 cm.

The base handle can also be adjusted in height, enabling any user to work in an ergonomically responsible way.

MINIMUM EFFORT, MAXIMUM RESULTS

Summarizing, the STRAKVLAK is a handy and quick tool for the professional gardener and paver to enlighten the heavy duty of levelling.

The Dutch Health and Safety Inspectorate recommends the use of the STRAKVLAK.

ADDITIONAL APPLICATIONS

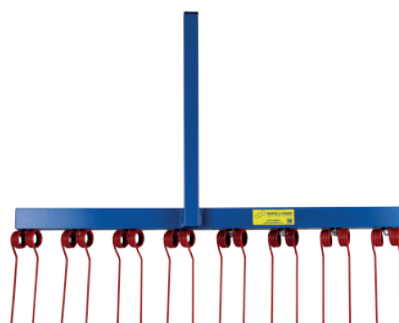

Two additional accessories are available and can be attached to the small STRAKVLAK model.

The seed rake is ideal to rake in grass seed meticulously and evenly. The sweeper is very handy to sweep sand into the joints between the paving elements.
